Dairy Herd KPI Meeting
Wednesday 27th March 2019
At Quedgeley
11am - 2pm

Key Performance Indicators – KPIs

Any herd that is producing milk will have at least some basic data being collected by National Milk Laboratories (NML) such as milk quality and bulk Somatic Cell Counts (SCC). The available data is even greater for herds recording with the NMR/CIS or having independent data recording systems such as Interherd.
This is hugely valuable source of information for the farm and we are able to extract this data to compare standard key performance indicators - KPIs.

The aim of these quarterly meetings of milk producers is to present and discuss herd data aimed at:

- Comparing performances between herds
- Looking at trends
- Benchmarking against similar herds or national performance
- Understanding what are the underlying issues controlling these trends
- Ways of improving performance

The meeting topic will be:

Mastitis Review –
Vaccinations, Treatment and Analysis

Tea/coffee and lunch will be provided
This meeting will be eligible for Dairy Pro Points

Tel. 01452 543999 or Email – farmteam@woodvet.co.uk or largeanimal@woodvet.co.uk to book your place
