Dairy Herd KPI Meeting
Wednesday 27th November 2019
At Quedgeley
11am - 2pm

Lameness KPI Meeting

Nearly all dairy farms will be coping with some lameness on farm but this will always be at the detriment of performance and welfare. Across the UK, lameness lesions are continually changing where we alter cow housing however the overall rate is still higher than industry target.
Across the practice we are continually recording data including number of lame cows, mobility percentages and what lesions are being identified in lame cows. For this meeting we will be using Wood Vet Group trimming and mobility data. **As such it will be suitable to ALL dairy herds regardless of milk recording data.**

The aim of this lameness meeting is to present and discuss data aimed at:

- Comparing lameness performances between herds
- Looking at changing trends in lesions
- Understanding what are the underlying issues influencing lesions and treatment success
- New approaches to control lameness and reduce time spent trimming lame cows

The meeting topic will be:

Lameness Review –
Lesion analysis, Prevention and Treatment

Tea/coffee and a hot lunch will be provided
This meeting will be eligible for Dairy Pro Points

Tel. 01452 543999 or Email – farmteam@woodvet.co.uk or largeanimal@woodvet.co.uk to book your place

WOOD VETERINARY GROUP is the trading name of Wood Veterinary Group Limited. Co. Number 9053619. Registered Office as above. Registered in England and Wales
